

2. Backend Developer

@Kaspertech [<https://www.linkedin.com/company/kaspertech/>]

Employment Type: Internship

Apply within: 07 days

Salary: 10K per month

Location: Work from home

Responsibilities

Selected intern's day-to-day responsibilities include:

1. Work as part of a team whilst developing applications and services using agile development methods
2. Working on development with PostgreSQL, MySQL and MongoDB as per project requirement
3. Creating APIs for the back-end services as per requirements
4. Code, test, and operate Node.js based services
5. Work on integration of user-facing elements developed by front-end developers with server-side logic
6. Improve and test the code continuously for any bugs
7. Work on implementation of security and data protection
8. Work on integration of data storage solutions (may include databases, key-value stores, blob stores, etc.)
9. Work on design and implementation of low-latency
10. Maintain the central database while ensuring high performance and responsiveness to requests from the front-end.
