

2. Cloud Computing Engineer

@Quixote Automotive Technologies Pvt Ltd [<https://quixote.in/>]

Employment Type: Full-time

Apply within: 15 days

Salary: Up to 18L per year

Location: Gurgaon, Haryana

Description

Quixote (pronounced kee-yo-tee), is an automotive tech start-up working in Connected Cars, InsureTech, ADAS and autonomous vehicular technology.

At Quixote, everyone is a geek and everyone loves what they do, and everyone is working towards a common goal! We are an ambitious young company that wishes to change the world with the technology that we develop. We truly believe in the words of Margaret Mead, ""Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has!"". and work diligently & strategically to convert our ideas into technological products.

Candidate shall be responsible for designing, development and implementation of scalable and high performance cloud solutions. They'll be exploring new cloud technologies, benchmarking them and check their performance to integrate them in the main system. Their role will be crucial to Quixote's success.

DUTIES & RESPONSIBILITIES

- Design and develop highly available, performant and secure cloud-based solutions.
- Automate the deployment processes, customizations, upgrades and monitoring for all our different data stores.
- Evaluate that the existing infrastructure and processes are in place for managing and upgrading our services.
- Guide and implement the use of better tools and practices, and champion adopting better technologies.
- Analyze and improve efficiency, scalability, and stability of the various data persistence layers.
- Build, automate and secure application configuration, auto deployment and provisioning services.
- Monitor various resources of cloud deployment to keep it secure, persistent and healthy.
- Building support infrastructure for deploying AI/ML models to make them highly available.
- Design and develop continuous data pipelines and integrate stream processing.
- Work hand-in-hand with the cyber security team for keeping the system stable, secure and performant.

REQUIRED SKILLS & EXPERIENCE

- Expertise with Linux and systems programming
- Expertise in networking and security best practices.

- Experience with build systems, version control, and testing methodologies
- Experience with scale-out database or storage systems: MongoDB(preferred), ElasticSearch, Cassandra, Spark, or S3
- Familiarity with streaming services and systems.
- Expertise in serverless architecture.
- Expertise of microservices and DevOps.
- Ability to script in any of the following: Perl, Python, or Bash
- Experience with cloud platforms: AWS, GCP.
- Experience with Load Balancers and high-available service design
- Experience with continuous integration and deployment automation tools such as Jenkins, Salt, Puppet, Chef, Ansible, Travis CI or equivalent.
- Passion for the field and the work ethics to learn advanced concepts.
