

2. Senior Product Designer

@Pathya [<https://www.pathya.app/>]

Employment Type: Contract basis

Apply within: 15 days

Salary: To be determined on basis of work

Location: Work from Home

Roles & Responsibilities

- Own the end-to-end product design for several areas of our software and IoT platform
- Collaborate with fellow designers, product managers, and engineering leads to define valuable problems and solve them with intuitive, engaging, and modern design
- Talk with customers regularly to understand their journey and motivations
- Lead internal discussions to share learnings and hone solution spaces to align with business goals
- Create wireframes and simple prototypes to verify usability and delivered value
- Advocate for intuitive, accessible UI and be a champion for design best practices
- Create high-fidelity interface designs for iOS, Android, and responsive web platforms
- Mentor other product designers on the team
