

1. NodeJS Developer

@Pathya [<https://www.pathya.app/>]

Employment Type: Full time

Apply within: 30 Days

Salary: 6-7 LPA

Location: Work from home

Responsibilities

Your primary focus will be the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

- Integration of user-facing elements developed by front-end developers with server side logic
- Writing reusable, testable, and efficient code
- Design and implementation of low-latency, high-availability, and performant applications
- Implementation of security and data protection

Skills And Qualifications:

- Strong proficiency with JavaScript & OOPS
- Knowledge of Node.js and frameworks available for it
- Understanding the nature of asynchronous programming and its quirks and workarounds
- Good understanding of server-side CSS preprocessors
- Basic understanding of front-end technologies, such as HTML5, and CSS3
- Understanding accessibility and security compliance
- User authentication and authorization between multiple systems, servers, and environments
- Creating database schemas that represent and support business processes
- Implementing automated testing platforms and unit tests
- Proficient understanding of code versioning tools, such as Git
- Knowledge of AWS will be preferable

2. React Native Developer

@Pathya [<https://www.pathya.app/>]

Employment Type: Full time

Apply within: 30 Days

Salary: 6-7 LPA

Location: Work from home

Responsibilities

We are looking for a React Native developer interested in building performant mobile apps on both the iOS and Android platforms. You will be responsible for architecting and building the application Pathya.app, as well as coordinating with the teams responsible for other layers of the product infrastructure. Building a product is a highly collaborative effort, and as such, a strong team player with a commitment to perfection is required.

Roles and Responsibilities:

- Build pixel-perfect, buttery smooth UIs across both mobile platforms.
- Leverage native APIs for deep integrations with both platforms.
- Diagnose and fix bugs and performance bottlenecks for performance that feels native.
- Reach out to the open-source community to encourage and help implement mission-critical software fixes React Native moves fast and often breaks things.
- Maintain code and write automated tests to ensure the product is of the highest quality.
- Use exciting app build in swift and Kotlin and convert it to react-native

Desired Candidate Profile

- Firm grasp of the JavaScript language and its nuances, including ES6+ syntax
- Knowledge of functional or object-oriented programming
- Ability to write well-documented, clean JavaScript code
- Rock-solid at working with third-party dependencies and debugging dependency conflicts
- Familiarity with native build tools & library like XCode, Gradle, saga, redux, re-animated, firebase
- Understanding of REST APIs, the document request model, and offline storage
- Experience with automated testing suites

Perks and Benefits

- We offer you work from home
- flexible with timing
- 5days working
- We trust our employee inspires them to do innovative things and explore and execute new techniques
